

To whom it may concern,

Das Energy was contracted by Ciment De Mauritanie for dismantling of 3.8 MW MAN HFO running power plant from Turkey and then erect and commission the whole power plant including the electrical and mechanical auxiliaries in Nouakchott, Mauritania. Das Energy dismantled the power plant, packed and shipped the power plant items to Nouakchott, procured and delivered the necessary items such as radiators, MV switchgear, LV distribution panel according to the mechanical and electrical design changes that are required, erected the power plant with local workers and Das technicians and engineers, and then commissioned the power plant. Das Energy has been providing maintenance and spare parts services since the commissioning of the power plant.

Yours faithfully,

Directeur des Opérations

Mohamed Sidi Bah
